

Application for Board Membership in NoSCoS – Mona Strøm

My name is Mona Strøm, and I work as a senior consultant with extensive clinical experience in neurology and rehabilitation. I am deeply committed to professional development, interdisciplinary collaboration, and quality improvement in the treatment and follow-up of individuals with spinal cord injuries. In addition to my clinical work, I have been actively involved in teaching and mentoring healthcare professionals, and I maintain a broad network within the field.

Currently, I am engaged in a research project focusing on the epidemiology, clinical course, and outcomes following traumatic cervical spinal cord injury in Norway. This work will form the basis of a PhD, and I look forward to contributing new knowledge that can strengthen both clinical practice and academic development.

I am motivated to serve as a board member of NoSCoS because I strongly believe in the organization's role as a unifying and driving force for professional collaboration and knowledge sharing across the Nordic countries. With my experience and ongoing research, I hope to contribute to the continued development of NoSCoS as a relevant and inspiring platform for innovation and advancement in the field of spinal cord injury.
